THE SCHILLING PRESS
137-139 EAST 25TH STREET
NEW YORK

LINCRUSTA-WALTON is now too well known to need description, as it has for many years occupied the foremost position in high class Relief Decorations, and owing to the fact of it being not only solid, but pliable and water-proof, there are endless possibilities for its use.

LINCRUSTA-WALTON can be made in color, solid throughout. This is inestimable in public and private work, saving time and cost of painting, besides preserving the sharpness and detail of the designs.

We have prepared a set of samples of Colored-throughout LINCRUSTA-WALTON which we should like you to see and which will give you a clear idea of the color and design, thus enabling you to take orders from.

LINCRUSTA-WALTON is practically indestructible and will last as long as the building it beautifies. It is damp-resisting and will stand any climate, owing to the nature of its composition.

LINCRUSTA-WALTON from the aesthetic standpoint affords the decorator an unexampled range of styles from which to choose.

Great care must be taken to order sufficient LINCRUSTA-WALTON Colored-throughout to complete the job in hand, for we cannot guarantee the exact shade in subsequent orders.

LINCRUSTA-WALTON is sold in the natural buff to be treated in color by the decorator, but nearly all the patterns can now be had colored throughout in all the newest and best shades, as shown by our sample set.

For durability LINCRUSTA-WALTON is unequaled. It is sanitary, not affected by time, water nor any of the causes that easily damage other hangings, and for this reason it is the most economical method of decorating the wall or ceiling.

Have you seen and tried our LINCUSTA-WALTON Burlaps, Colored Throughout? They are especially popular for stairways, libraries, dining-rooms, halls, etc.

The advantages of our Burlaps over the woven are many and important. A few of these are:

First: They are absolutely sanitary and water-proof.

Second: They can be washed down when on the wall.

Third: They will not absorb moisture, therefore do not become loose on the wall, nor swell and wrinkle.

Fourth: They are easily hung, and do not stretch when the paste is applied as do ordinary Burlaps.

READ CAREFULLY

GENERAL SUGGESTIONS

READ CAREFULLY

The greatest Care should be observed in cutting the edges straight. This is best done by means of a straight-edge, which should either be wholly of iron, or, if of wood, have an iron or steel edge.

The straight-edge is placed on the edge of the LINCRUSTA-WALTON, which should be previously laid upon a table with a strip of zinc about five or six inches wide, and the material is cut to the design margin with a sharp knife the same being held at a slight inward inclination so as to undercut the material and ensure a good joint. The piece is then divided into the necessary lengths for dadoes, fillings, panels, etc., as may be required.

The Workman can now Proceed with the Hanging

A strong paste mixed with a little glue should be used warm and be sufficiently and evenly worked in, but not in such quantity as to in any degree soak the backing or work out of the edge in rolling. Then take the piece of pasted LINCRUSTA-WALTON and attach it to the wall under the cornice, and gradually press it to the wall, making the joint good until it reaches the bottom. In doing this, care should be taken to work from the centre outwards, so as to avoid the air getting under the piece and preventing adhesion.

The appearance of blisters on the surface after the material has been fixed is caused by the paste swelling the paper, this will dry right back again in its place. The blisters can easily be removed by pricking the surface with a pen knife so as to allow the air to escape.

For Cleaning Lincrusta

Should the LINCRUSTA become soiled in hanging, a little soap and water or spirits of turpentine applied with a sponge will quickly remove all dirt.

NOTE. All Hangings are sold by the roll and Borders by the roll or full yard, as indicated in the price-list.
In ordering Borders be careful to state whether you want full width or only single yards.
